

MISSOURI REVERSE TRANSFER
seamless associate degree completion

The Missouri Reverse Transfer Program allows students to use college credit earned at two- and four-year higher education institutions to qualify for an associate degree.

Students who have completed at least 15 credit hours at a qualifying two-year college and transferred to a four-year college or university in Missouri can transfer credit hours back to the two-year college to earn an associate degree. Students who are not currently attending college but who have earned enough credits at a two- and a four-year institution could also qualify for a reverse transfer degree.

What are the benefits?

The Missouri Reverse Transfer Program provides students with an opportunity to earn an associate degree while pursuing their bachelor's degree. An associate degree can open the door to more job opportunities and higher pay. It can also fulfill the general education requirements when transferring to four-year college or university.

Who is eligible?

Students must have earned a minimum of 15 transferable credit hours at a single two-year institution to be eligible for a reverse transfer

degree. Students who have already been received an associate degree or higher are not eligible for the reverse transfer degree.

How do you participate?

Applying for a reverse transfer degree is a simple and seamless process. Students need to "opt in" and grant the four-year college or university they are attending permission to share their grade transcripts with the two-year college they attended.

Students should contact the **reverse transfer coordinator** at their college or university for additional information about the program.
